

AJIBONA RAHEEM IBIYEMI

- Lagos, Nigeria | ajibonaraheem@gmail.com | 09022849844 | github.com/Ajibzrahz | linkedin.com/in/ajibonaraheem

PROFESSIONAL SUMMARY

Backend developer with hands-on experience building RESTful APIs using Node.js, Express, and MongoDB.

Experienced in implementing authentication systems, designing database schemas, and developing scalable backend solutions.

Currently seeking opportunities as a junior backend developer to contribute to real-world applications and grow in a production environment.

EDUCATION

Federal University of Agriculture (FUNAAB) – Abeokuta, Nigeria

B.Sc. Computer Science | Apr. 2023 – Present

EXPERIENCE

IT Intern – Jubaili Bros Engineering Limited | Apr. 2025 – Sept. 2025

- Assisted in Windows Server setup, Active Directory, and Remote Desktop Services.
- Configured network devices, CCTV systems, shared printers, and scanners.
- Gained exposure to Microsoft Azure, DevOps practices, and cloud storage solutions.
- Provided technical support for staff including laptop/monitor setup and troubleshooting.
- Documented IT procedures and contributed to improving IT infrastructure performance.

Teacher / School Tutor – Comprehensive Academy, Ogun | Jul. 2022 – Mar. 2023

- Tutored students in Mathematics, Physics, and Chemistry for WASSCE preparation.
- Supervised and proctored examinations; graded student scripts.

Desktop Publishing Intern – Bright Computer Training, Lagos | Oct. 2021 – May 2022

- Created and edited documents and layouts using Microsoft Publisher.
- Organized and maintained digital resources for designs and publications.
- Assisted in basic web design tasks (HTML & CSS) for training projects.

PROJECTS

- **MART (Node.js, Express, MongoDB)** - Developed a scalable RESTful API for an e-commerce system using Node.js, Express, and MongoDB, implementing JWT-based authentication, role-based access control, and secure user session management.
Designed and optimized database schemas, handled CRUD operations, and ensured efficient data handling for products, users, and orders.
- **DO-IT (Node.js, Express, MongoDB)** - Built a task management backend system with Node.js and MongoDB, enabling users to create, update, categorize, and track tasks with deadline management and completion status. Implemented structured API endpoints and optimized database queries for performance and reliability.
- **LIVESTOCK COST ESTIMATOR (Node.js, Express, MongoDB)** - Developed a backend system for a livestock cost estimation platform that helps users analyze and estimate farming costs based on different parameters such as livestock type, scale, and operational expenses. Designed and implemented RESTful APIs to handle data processing, user input, and cost calculations, ensuring efficient and structured data flow. Built secure authentication features including user registration, login, and email verification using JWT. Structured and optimized MongoDB database schemas to manage cost data, user information, and system outputs efficiently. Integrated backend logic to support scalable and flexible cost estimation models for real-world agricultural use cases.

TECHNICAL SKILLS

- Backend & Databases: Node.js, Express.js, MongoDB, Mongoose
- Programming: JavaScript (ES6+), Typescript (learning), GO (Golang), HTML, CSS
- Cloud & DevOps: Microsoft Azure (Basics), Git/GitHub, Postman
- Networking & IT Support: Windows Server, Active Directory, Remote Desktop Services, Networking Fundamentals

- Productivity Tools: Microsoft Office Suite (Word, Excel, PowerPoint)
- REST API Design & Authentication (JWT)

CERTIFICATIONS

- The Complete Developer's Guide (Golang) – (Udemy, 2024)
- Node.js Backend Development (Axia Africa, 2025)

Soft Skills: Communication, Time Management, Teamwork, Problem Solving, Adaptability.
