PROFESSIONAL SUMMARY

Backend developer with hands-on experience building RESTful APIs and full-stack SaaS products using Node.js, Express, and MongoDB. Experienced in implementing authentication systems (including managed auth providers and OAuth), integrating third-party payment platforms, designing database schemas, and shipping production backends that integrate with machine-learning services. Currently seeking opportunities as a junior backend developer to contribute to real-world applications and grow in a production environment.

EDUCATION

Federal University of Agriculture (FUNAAB) – Abeokuta, Nigeria
B.Sc. Computer Science | Apr. 2023 – Present

EXPERIENCE

IT Intern – Jubaili Bros Engineering Limited | Apr. 2025 – Sept. 2025

- Assisted in Windows Server setup, Active Directory, and Remote Desktop Services.
- Configured network devices, CCTV systems, shared printers, and scanners.
- Gained exposure to Microsoft Azure, DevOps practices, and cloud storage solutions.
- Provided technical support for staff including laptop/monitor setup and troubleshooting.
- Documented IT procedures and contributed to improving IT infrastructure performance.

PROJECTS

LINKFOLD (Node.js, Express, MongoDB, Supabase, Stripe)

Built and shipped the backend for a full-stack link-in-bio SaaS platform with click analytics gated behind a paid Pro tier. Implemented managed authentication with Supabase, including Google OAuth sign-in, and integrated Stripe subscriptions with webhook-driven billing so subscription status is always verified server-side. Designed MongoDB schemas linking third-party identity records to application state.

LIVESTOCKIQ – LIVESTOCK COST ESTIMATOR (Node.js, Express, MongoDB, Python, FastAPI)

Shipped an intelligent livestock cost-estimation and financial forecasting platform as final-year project author, integrating a Python FastAPI machine-learning service (four Gradient Boosting Regressor models predicting cost, revenue, profit, and ROI) with a Node.js/Express backend and MongoDB. Built RESTful APIs for data processing, user input, and cost calculations, secure JWT-based authentication with email verification, and resolved cross-service production bugs during deployment on Render.

MART (Node.js, Express, MongoDB)

Developed a scalable RESTful API for an e-commerce system using Node.js, Express, and MongoDB, implementing JWT-based authentication, role-based access control, and secure user session management. Designed and optimized database schemas, handled CRUD operations, and ensured efficient data handling for products, users, and orders.

DO-IT (Node.js, Express, MongoDB)

Built a task management backend system with Node.js and MongoDB, enabling users to create, update, categorize, and track tasks with deadline management and completion status. Implemented structured API endpoints and optimized database queries for performance and reliability.

EXPENSE TRACKER (Node.js, Express, MongoDB)

Built the backend for a full-stack personal finance app: REST API for tracking transactions, setting monthly budgets, and generating spending analytics and reports, served to a Next.js client. Resolved cross-origin and deployment configuration issues, and corrected budget-period logic to align with calendar months rather than record creation dates.

TECHNICAL SKILLS

Backend & Databases: Node.js, Express.js, MongoDB, Mongoose, FastAPI (Python)

Auth & Payments: JWT, OAuth (Google), Supabase Auth, Stripe (subscriptions & webhooks)

Programming: JavaScript (ES6+), Python, TypeScript (learning), Go (Golang), HTML, CSS

Cloud & DevOps: Render, Vercel, Microsoft Azure (Basics), Git/GitHub, Postman

Networking & IT Support: Windows Server, Active Directory, Remote Desktop Services, Networking Fundamentals

Productivity Tools: Microsoft Office Suite (Word, Excel, PowerPoint)

REST API Design & Authentication (JWT)

CERTIFICATIONS

- The Complete Developer's Guide (Golang) – (Udemy, 2024)
- Node.js Backend Development (Axia Africa, 2025)
- Registered Graduate Member, Computer Professionals Registration Council of Nigeria (CPN) – GMCPN (2026)

Soft Skills: Communication, Time Management, Teamwork, Problem Solving, Adaptability.
