PROFESSIONAL SUMMARY

Backend developer with hands-on experience building RESTful APIs and backend services for SaaS products using Node.js, Express, and MongoDB. Experienced in implementing authentication systems (including managed auth providers and OAuth), integrating third-party payment platforms, designing database schemas, and shipping production backends that integrate with machine-learning services. Registered member of the Computer Professionals Registration Council of Nigeria (CPN). Seeking opportunities as a backend developer to contribute to real-world applications and grow in a production environment.

EDUCATION

B.Sc. Computer Science – Federal University of Agriculture (FUNAAB) – Abeokuta, Nigeria*2023 – 2025*
Graduated — awaiting degree award

EXPERIENCE

IT Intern – Jubaili Bros Engineering Limited *Apr. 2025 – Sept. 2025*

- Assisted in Windows Server setup, Active Directory, and Remote Desktop Services.
- Configured network devices, CCTV systems, shared printers, and scanners.
- Gained exposure to Microsoft Azure, DevOps practices, and cloud storage solutions.
- Provided technical support for staff including laptop/monitor setup and troubleshooting.
- Documented IT procedures and contributed to improving IT infrastructure performance.

PROJECTS

LINKFOLD (Node.js, Express, MongoDB, Supabase, Stripe)

- Built and shipped the backend for a link-in-bio SaaS platform with click analytics gated behind a paid Pro tier.
- Implemented managed authentication with Supabase including Google OAuth sign-in, and integrated Stripe subscriptions with webhook-driven billing so subscription status is always verified server-side.
- Designed MongoDB schemas linking third-party identity records to application state.

LIVESTOCKIQ — Livestock Cost Estimator (Node.js, Express, MongoDB, Python, FastAPI)

- Shipped an intelligent livestock cost-estimation and financial forecasting platform as a final-year project, integrating a Python FastAPI machine-learning service (four Gradient Boosting Regressor models predicting cost, revenue, profit, and ROI) with a Node.js/Express backend and MongoDB.
- Built RESTful APIs for data processing, user input, and cost calculations, with secure JWT-based authentication and email verification.
- Resolved cross-service production bugs during deployment on Render.

MART — E-Commerce API (Node.js, Express, MongoDB)

- Developed a scalable RESTful API with JWT authentication, role-based access control, and secure user session management.
- Designed and optimized database schemas; handled CRUD operations for products, users, and orders.

DO-IT — Task Management API (Node.js, Express, MongoDB)

- Built a task management backend enabling users to create, update, categorize, and track tasks with deadline management and completion status.
- Implemented structured API endpoints and optimized database queries for performance and reliability.

TECHNICAL SKILLS

Backend & Databases: Node.js, Express.js, MongoDB, Mongoose, FastAPI (Python)
Auth & Payments: JWT, OAuth (Google), Supabase Auth, Stripe (subscriptions & webhooks)

Programming: JavaScript (ES6+), Python, TypeScript (learning), Go (Golang), HTML, CSS
Cloud & DevOps: Render, Vercel, Microsoft Azure (Basics), Git/GitHub, Postman
Networking & IT: Windows Server, Active Directory, Remote Desktop Services, Networking Fundamentals

CERTIFICATIONS & PROFESSIONAL MEMBERSHIP

- Graduate Member — Computer Professionals Registration Council of Nigeria (CPN) | July 2026
- Node.js Backend Development — Axia Africa, 2025
- The Complete Developer's Guide (Golang) — Udemy, 2024

SOFT SKILLS

Communication • Time Management • Teamwork • Problem Solving • Adaptability
